wear the next level of comfort

ES-9702 Limited deep blue/white

Hinge less

This type is made of a material used in medical equipment called rabalon. It has a unique structure with open sides at the front that makes it possible to fold the eyeglass.

This eyeglass has both a stable and stress free fit that can endure movement during sports without applying pressure to the head.

60□17

spec espace
ES-9702

A sunglass made of a light weight nylon resin and titanium.

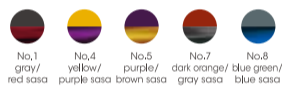

ES-6058 No.3S deep blue/silver

Titanium + Acetate temple

spec espace
ES-6401

A simple square frame made from thin titanium wire. The color variation suits both male and female tastes, as well as various scenes from business to casual.

spec espace
ES-6058

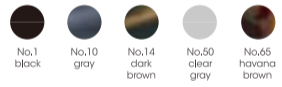

A structured Wellington style frame that gives a classic feel to the wearer. The acetate temple also gives a casual impression. Both sides of the front are kept open to be able to fit aspherical lenses.

Celluloid

spec espace
ES-8208

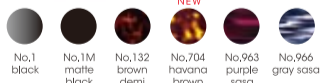

To give the frame a solid feel which wraps the wearer's face, this piece is constructed of a 8mm celluloid material, and is carefully handcrafted using a file to carve out the frame. A simple and slightly small fox type eyeglass gives the wearer a sleek style.

ES-6401 No.1 gray/red sasa

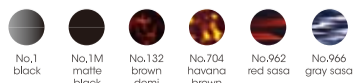

spec espace
ES-9012

The round Wellington type ES-9013 or the square type ES-9012 are both a standard form that fits all types of faces. This type is a acetate sunglass with an adjustable silicone nose pad.

spec espace
ES-9013

Admiration of space,
liberation an invitation to infinity.

"spec espace" defines space, structure of the universe, and performance. The form of the frame creates a certain space, which naturally embraces the face, bringing another expression to the visage. The impression of the profile is an innovative look.

"spec espace" is also particular about the genuine product to be made in Japan. In Kawada, located in eastern Sabae-shi. Fukui prefecture, there is a family-owned factory district where frames are fabricated. The products completed by skillful craftsmen have exclusive techniques in which it creates an outstanding quality. The masterful artistry of these craftsmen has always supported "spec espace".

When imagining an infinite space, people fantasize and seek their dream. The concepts of "spec espace" are "Spacious form" "Mode" "Village Factories" "Craftman" and "Tradition". By uniting these concepts, the eyewear creates an infinite space like a universal diffusion made into form.
